

Tournament Management Software

UA Badminton Club

Junfeng Xu, Enfa George, Rupal Jain, Urvika Gola

Structure of the Presentation

1. Introduction
2. Customer Need
3. Project Goals
4. System Description
5. Solution Approach
6. Project Management
7. Team
8. Constraints and Risks

Introduction

Introduction

- Our Customer: UA Badminton Club
- Their Complaint
- Our challenges
 - Lack of domain knowledge
 - Scheduling
 - New to web application development

Customer Need

Customer Need

- We have met with the customer
- An easy to use and cost effective tournament management software
- 6 high priority and 2 low priority initial stories are created

Project Goals

Project Goals

- The customer problem we are solving
- Measure of success

System Description

Main Modules

- Registration
- User Management
- Seed & Draw
- Match Management

System Description

Solution Approach

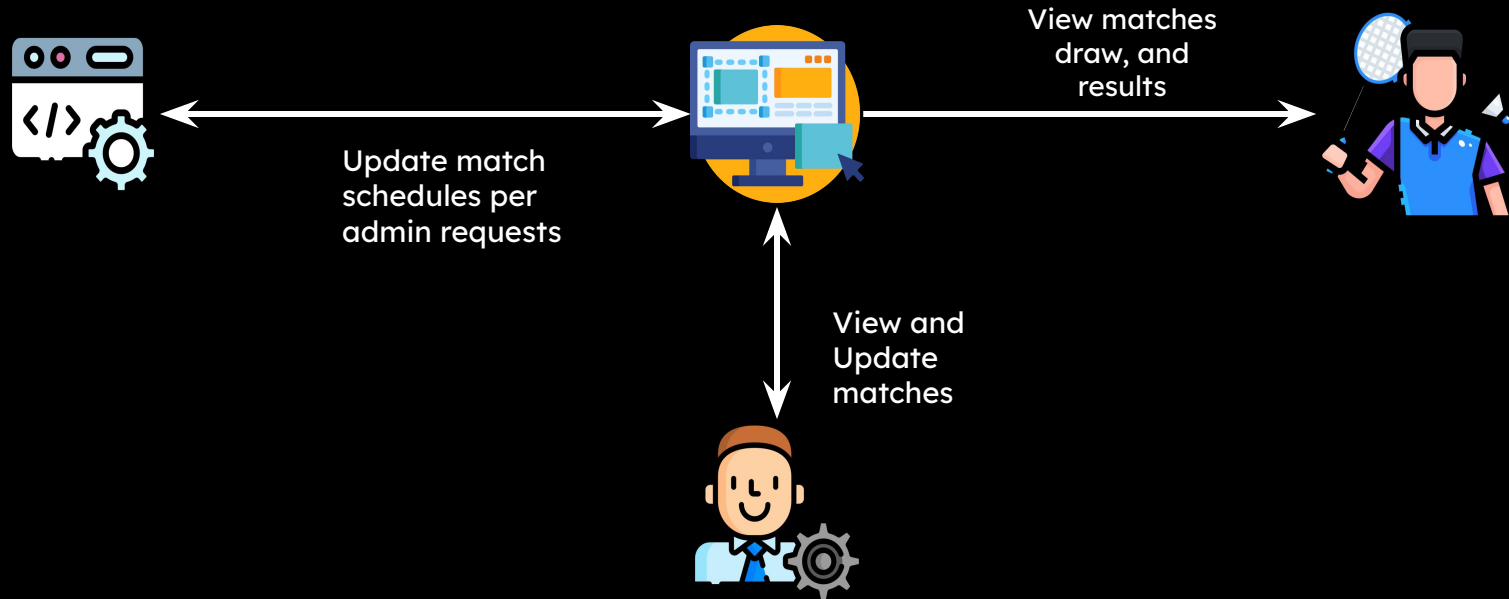

Platforms, tools, libraries

System Workflow (when registration is open)

System Workflow (once registration is closed)

Tests and Evaluation

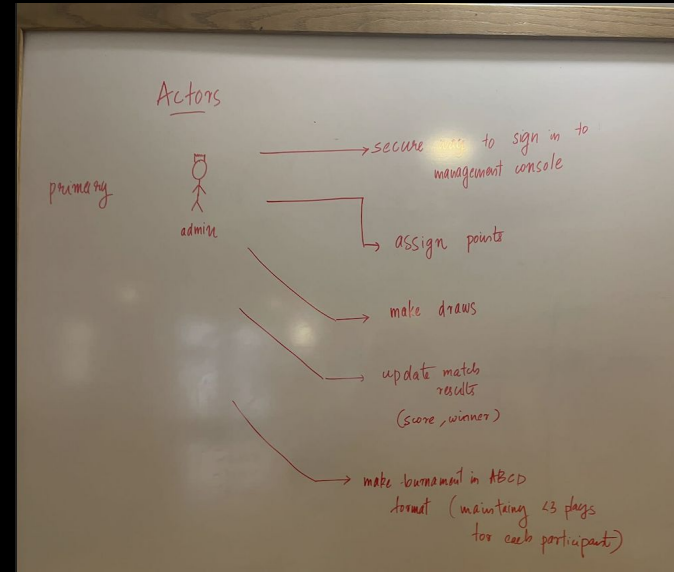

- Unit tests
- Integration tests
- Acceptance tests

Project Management

Distribute Work:

Break work into smaller, manageable work items with a **goal**

Distribute Work: Skill Grid

to identify available skills and find potential skill gaps

Team	Python	AWS	Flask	HTML	CSS	Design
1	8/10	7/10	9/10	7/10	3/10	2/10
2	4/10	5/10	7/10	6/10	8/10	3/10
3	6/10	9/10	5/10	8/10	5/10	7/10
4	8/10	9/10	7/10	9/10	7/10	6/10

Development Process: Scrum

1. Frequent interaction with the customer
2. **Quicker releases** of useable product to customers, keeping customer happy.
3. Iterative structure fostering **collaboration** within the team and manage **risks**
4. Continuous improvement
5. **Sprints** - Keep the focussed and the project on track

Meeting Goals

- **Daily scrum:** Twice in a week, update the daily standup dashboard in Altassian, Confluence tool.

Daily Standup for UA Badminton Tournament

Created by Urvika Gola, with a template
Last updated: just a moment ago • 1 min read

Team name

ua-badminton-tournament

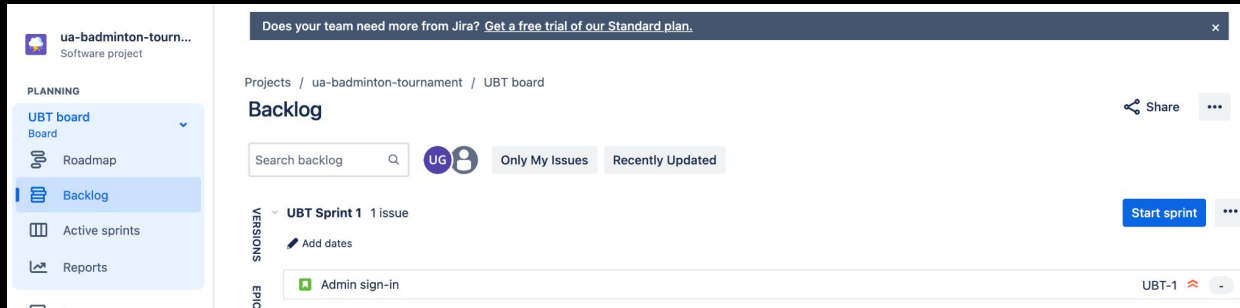

Thursday <Feb 16>

	Name	What did I work on yesterday 🧐	What am I working on today? 😊	What issues are blocking me? 😞
1	@Urvika Gola			
2	@Enfa George			
3	@Junfeng Xu			
4	@Rupal Jain			

Meeting Goals (contd..)

- **Update Jira dashboard:** Create / update Epics, Tasks, Stories, Bugs, Sprint progress

- **Sprint Retrospective:** Bi-weekly, update Sprint backlog, update product backlog
- **Review risks** (requirements change, team coordination (schedule) risks, quality issues etc.)

Meeting Goals (contd..)

- 5. Demos with the customer
- 6. 360° Feedback

Team

Team /Developers:

- Junfeng Xu (Product Owner)
- Urvika Gola (Scrum Master 1)
- Rupal Jain (Scrum Master 2)
- Enfa George

Constraints and Risks

Ethical constraints:

- PID
- Security features

Legal constraints:

- Accessibility laws
- Copyrights/Trademarks

Policy constraints:

- Data protection.

Risk: Data breaches,
Technical failure
